

Carson Kopec

Conway, South Carolina | 843-742-4845 | kopeccarson@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer science research intern supporting Coastal Carolina University research through a LANL contract. Current work focuses on high-performance computing (HPC), cost forecasting for HPC centers, and technical research related to computing infrastructure, resource planning, and operational cost drivers.

EXPERIENCE

Coastal Carolina University - Temp Staff, CSCI

June 7, 2026 - Present

Internship / Research Support | Conway, South Carolina

- Conducting research through a LANL contract focused on high-performance computing (HPC).
- Researching cost forecasting approaches for HPC centers and computing infrastructure.
- Reviewing technical and operational factors that influence HPC center costs, capacity planning, and long-term resource needs.
- Supporting research documentation and analysis related to computing infrastructure, resource planning, and cost drivers.
- Assisting with university-led research tasks connected to advanced computing systems.

PROJECTS & RESEARCH

HPC Cost Forecasting Research - Coastal Carolina University / LANL Contract

- Exploring forecasting considerations for HPC center expenses, including compute resources, infrastructure needs, and operational planning.
- Investigating how cost models can support planning for HPC centers and high-performance computing environments.
- Summarizing research findings to support project analysis and technical understanding.

RESEARCH FOCUS

High-Performance Computing: Research involving HPC centers, computing infrastructure, and advanced computing environments.

Cost Forecasting: Analysis of cost factors, planning considerations, and forecasting methods for HPC centers.

Resource Planning: Research related to compute resources, operational needs, and infrastructure planning.

SKILLS

High-Performance Computing Research | Cost Forecasting | Technical Research | Research Documentation | Computing Infrastructure | Resource Planning | Data Analysis | Technical Communication | Problem Solving

ADDITIONAL INFORMATION

- Current Temp Staff, CSCI research internship at Coastal Carolina University.
- Research exposure connected to a LANL contract involving HPC and cost forecasting.
- Professional profiles available through LinkedIn and GitHub.
